“Code of the Photo Journalists”

Visual journalists operate as trustees of the public. Our primary role is to report visually on the significant events and varied viewpoints in our common world. Our primary goal is the faithful and comprehensive depiction of the subject at hand. As visual journalists, we have the responsibility to document society and to preserve its history through images.

Photographic and video images can reveal great truths, expose wrongdoing and neglect, inspire hope and understanding and connect people around the globe through the language of visual understanding. Photographs can also cause great harm if they are callously intrusive or are manipulated.

This code is intended to promote the highest quality in all forms of visual journalism and to strengthen public confidence in the profession. It is also meant to serve as an educational tool both for those who practice and for those who appreciate photojournalism. To that end, The NYS SkillsUSA and National Press Photographers Association sets forth the following.

CODE OF ETHICS

Visual journalists and those who manage visual news productions are accountable for upholding the following standards in their daily work:

1. Be accurate and comprehensive in the representation of subjects.
2. Resist being manipulated by staged photo opportunities.
3. Be complete and provide context when photographing or recording subjects. Avoid stereotyping individuals and groups. Recognize and work to avoid presenting one's own biases in the work.
4. Treat all subjects with respect and dignity. Give special consideration to vulnerable subjects and compassion to victims of crime or tragedy. Intrude on private moments of grief only when the public has an overriding and justifiable need to see.
5. While photographing subjects do not intentionally contribute to, alter, or seek to alter or influence events.
6. Editing should maintain the integrity of the photographic images' content and context. Do not manipulate images or add or alter sound in any way that can mislead viewers or misrepresent subjects
7. Do not intentionally sabotage the efforts of other journalists.

Ideally, visual journalists should:

Strive by example and influence to maintain the spirit and high standards expressed in this code. When confronted with situations in which the proper action is not clear, seek the counsel of those who exhibit the highest standards of the profession. Visual journalists should continuously study their craft and the ethics that guide it.
