2020 SkillsUSA NY Standards 1
SCOPE OF THE CONTEST

The contest is divided into two parts: a written exam and a series of testing stations designed to assess knowledge in Hydronic Heating industry standards.

Knowledge Performance

The contest will include a written knowledge exam assessing knowledge of Hydronic Heating. The test will be completed during the contest.

Skill Performance

1. Contestants will be given job sheets explaining the tasks to be performed.
2. Contestants will be asked to assemble on a boiler all necessary heating specialties such as circular, flow valves, air scope, expansion tank, etc. with pipe and fittings so that the boiler may be connected to a two zone hot water heating system.
3. Projects will not include air conditioning units.
4. Contestant’s knowledge of equipment, fittings and parts associated with heating systems, domestic hot water and gas, and oil burners will be tested.
5. Contestants will be rated on their technical knowledge, identification, manipulative skills, safety and speed.
